

TECHNICAL DATA SHEET

Revision: 6

Edition: June/2024

STANLUX FLAKE 4175

- Aluminium powder in lamellar form
- Leafing grade with medium particles

SPECIFIED CHARACTERISTICS

- Maximum retention in # 325 Mesh 1.5%
- Minimum water coverage 15,000 cm²/g

INFORMATIVE CHARACTERISTICS

- Average Particles Size- (D50 - Malvern) 18 microns
- Minimum solid content 97%

Typical Uses

- Plastics

Before using the product, we recommend that you consult the safety information, including the adequate handling and transport, which are available in the product's Material Safety Data Sheet – MSDS. The information mentioned in this technical bulletin represents our current level of knowledge and experience, but shall not be considered as a guarantee. It is the user's responsibility to assure the adequate use of the product, since **Aldoro** will not accept liability on any type of loss or damage which may arise due to the use of this information or application of the product. **Aldoro** reserves itself the right of changing, without prior notice, any data contained in this bulletin, resulting from adjustment, development or evolution of the production process.
