

## **TECHNICAL DATA SHEET**

Revision: 3

Edition: June/2024

### **STANLUX FLAKE DEG 4030**

- Special aluminium powder in lamellar form for light weight concrete
- Diethylene Glycol Solvent

#### ***SPECIFIED CHARACTERISTICS***

- |                                   |               |
|-----------------------------------|---------------|
| • Active metal                    | 70,0% approx. |
| • Solvent                         | 68% to 72%    |
| • Maximum retention in # 325 Mesh | 20.0% max.    |

#### ***INFORMATIVE CHARACTERISTICS***

- Average Particles Size (D50 - Malvern) 25 microns approx.

#### ***Typical Uses***

- Light weight concrete
