

TECHNICAL DATA SHEET

Revision: 3

Edition: June/2024

STANLUX PASTE 140 OP

- Aluminium pigment with paraffin oil in its composition.
- Medium particles size, with lamellar shape and leafing type.
- This grade offers advantage of clean handling and process during its application in masterbatch production, once it avoids dusting in the environment.

SPECIFIED CHARACTERISTICS

- | | |
|---------------------------------------|-------|
| • Aluminium | 80,0% |
| • Paraffin oil | 20,0% |
| • Maximum retention in # 325 Mesh (*) | 1.0% |

INFORMATIVE CHARACTERISTICS

- Average Particles Size- (D50 – Malvern) (*) 15 microns

Typical Uses

- Masterbatch for plastics.

(*)- The information refers to the paste batch used to produce the paste with paraffin oil.

Before using the product, we recommend that you consult the safety information, including the adequate handling and transport, which are available in the product's Material Safety Data Sheet – MSDS. The information mentioned in this technical bulletin represents our current level of knowledge and experience, but shall not be considered as a guarantee. It is the user's responsibility to assure the adequate use of the product, since **Aldoro** will not accept liability on any type of loss or damage which may arise due to the use of this information or application of the product. **Aldoro** reserves itself the right of changing, without prior notice, any data contained in this bulletin, resulting from adjustment, development or evolution of the production process.
