

## **TECHNICAL DATA SHEET**

Revision: 3

Edition: October/2024

### **STANLUX PASTE 266 OP**

- Aluminium pigment with paraffin oil in its composition.
- Fine particles size, with lamellar shape and leafing type.
- This grade offers advantage of clean handling and process during its application in masterbatch production, once it avoids dusting in the environment.

#### ***SPECIFIED CHARACTERISTICS***

- |                                       |       |
|---------------------------------------|-------|
| • Aluminium                           | 80,0% |
| • Paraffin oil                        | 20,0% |
| • Maximum retention in # 325 Mesh (*) | 0,1%  |

#### ***INFORMATIVE CHARACTERISTICS***

- Average Particles Size- (D50 – Malvern) (\*) 12 microns

#### ***Typical Uses***

- Masterbatch for plastics.
- Printing Inks

(\*)- The information refers to the paste batch used to produce the paste with paraffin oil.
