

## **TECHNICAL DATA SHEET**

Revision: 1

Edition: June/2024

### **STANLUX SILVER 3301**

- High performance aluminium paste with lamellar particles and narrow curve of particles size distribution
- Medium non leafing grade specially recommended for paint formulations that require high metallic effect
- Solvent: mixture of White Spirit and High Aromatic

#### ***SPECIFIED CHARACTERISTICS***

- |                                   |            |
|-----------------------------------|------------|
| • Solid content                   | 63% to 67% |
| • Maximum retention in # 325 Mesh | 0.10%      |
| • Maximum water content           | 0,15%      |

#### ***INFORMATIVE CHARACTERISTICS***

- Average Particles Size (D50 - Malvern) 24 microns

#### ***Typical Uses***

- Automotive coatings systems – refinishing and car parts
- Plastic coatings
- Coatings that require a high metallic effect
