

TECHNICAL DATA SHEET

Revision: 2

Edition: September/2024

STANLUX SILVER 3901

- High performance aluminium paste with lamellar particles and narrow curve of particles size distribution
- Fine non leafing grade specially recommended for paint formulations that require high hiding power
- Solvent: White Spirit and Nafta

SPECIFIED CHARACTERISTICS

- | | |
|-----------------------------------|------------|
| • Solid content | 63% to 67% |
| • Maximum retention in # 325 Mesh | 0.10% |
| • Maximum water content | 0,15% |

INFORMATIVE CHARACTERISTICS

- | | |
|---|-----------|
| • Average Particles Size- (D50 - Malvern) | 6 microns |
|---|-----------|

Typical Uses

- Can Coating
- Metal effect coatings that require a fine metallic pigment with high hiding power property

Before using the product, we recommend that you consult the safety information, including the adequate handling and transport, which are available in the product's Material Safety Data Sheet – MSDS. The information mentioned in this technical bulletin represents our current level of knowledge and experience, but shall not be considered as a guarantee. It is the user's responsibility to assure the adequate use of the product, since **Aldoro** will not accept liability on any type of loss or damage which may arise due to the use of this information or application of the product. **Aldoro** reserves itself the right of changing, without prior notice, any data contained in this bulletin, resulting from adjustment, development or evolution of the production process.
